

Please replace the second paragraph under OPERATION on page 8 with the following corrected paragraph:

--In each case, sections of stitching 34 and 35 are interrupted to leave openings through which inner clothing pockets are accessible to the hands of a wearer. When the illustrated garment is worn dress-side-out, it has the aesthetic appearance of a well-styled coat or jacket. When the illustrated garment is worn work-side-out, it presents the high visibility appearance that often is required by police and other safety officers. Whether the illustrated garment is worn dress-side-out or work-side-out, all of its protective features remain.--

REMARKS

This amendment corrects errors discovered by the applicant. These amendments do not add subject matter to the application.

In the paragraph under EXAMPLE 3:

(1) “A high luminosity polyester knit that has been fluorescent yellow or orange”, is replaced by --a high luminosity polyester knit that is fluorescent yellow or orange in color-- to correct the grammar.

(2) The third sentence is deleted because it is a near duplicate of the second sentence describing the weight of the material and --preferably-- is inserted into the second sentence after “knit” to make it exactly the same as the deleted third sentence.

(3) Reference number --30-- is inserted after “tape” in line 6 for clarity.

(4) “Knit stratum 32” is replaced by --facing stratum 22-- in the last two lines. There is no knit stratum 32. “32” is the reference numeral for one of the seams and the paragraph is describing the facing stratum.

In the paragraph under EXAMPLE 6:

(1) “Tape 62” is replaced by --tape 30-- in the first line to correct a typographical error.

(2) “Knit stratum 22” is replaced by --facing stratum 22-- in the first line to use terminology consistent with the remainder of the specification.

(3) “Knit stratum 32” is replaced by --facing stratum 22-- in the last two lines for the reason given above with respect to EXAMPLE 3.

In the second paragraph under OPERATION:

(1) “as at 92, 94 in Fig. 1” is deleted because it is not shown in Fig. 1 and because reference numerals 92 and 94 refer to a front panel and a sleeve, respectively, in Fig. 3.

Respectfully submitted,
ALTMAN & MARTIN
